

ABSTRACT

The invention relates to an adaptor for a braking deceleration device for doors or movable furniture parts, which essentially comprises a plunger which can be pushed into a housing against a braking force, with an adaptor body. According to the invention, in the adaptor body at least one accommodation recess for accommodating the housing of the braking deceleration device is made. The adaptor body comprises at least one smooth external surface by way of which it can be fixed to the frame or furniture carcass by means of a suitable adhesive.
